Simulation Schedule

In this section we give the step by step process for a single run of the disclosure game simulation.

- Generate 1000 women, and place them in a queue
- Generate 100 midwives.
- For each round of the game
  - Take 100 women from the queue
  - Pair each one with a random midwife
  - For each pair
    - Woman sends a signal
    - Midwife refers or not based on the signal
    - Woman is informed of their payoff, the midwife's type, and whether they are referred
